Updated Executive Orders: VR-203-G and VR-204-G

VST's Executive Orders VR-203 and VR-204 have been updated to Revision G.

Please carefully review these new Revision G versions as VST equipment installations are increasing daily.

Some important update examples include:

- A new tolerance range for positioning the liquid-removal mark during the initial hose installation.
- **Weekly** hanging hardware inspections have replaced **Daily** hanging hardware inspections.
- Amended the requirement of P/V valve on the membrane processor air outlet to allow for a rain cap or equivalent to be used.

Both updated Executive Orders can be found at www.vsthose.com and www.arb.ca.gov.
