UPDATE:

VST SRM-style Nozzle Availability
and Core Value
(Follow Up to the 9.29.10 Product Bulletin)

01.19.11

Since VST's last *SRM*-style nozzle Product Bulletin UPDATE (dated 9.29.10), VST has made great progress towards addressing the regulatory and market needs for this technology: An EVR Balance nozzle, inclusive of a hold-open latch, with a Secondary Release Mechanism.

VST is:

1. Caught up on **ALL** back-order demands that have been placed against us.
2. Back to our normal shipment schedule of 1 to 2 days from receipt of order.
3. Extending the \$105.00 Enhanced Core Value Program for a limited time.
 - a. Although VST's Product Bulletin (9.29.10) stated that the Enhanced Core Value Program would expire on January 31, 2011, VST is offering a **Limited Time Extension**.
 - b. **Limited Time Extension**:
 - In order to allow VST Distribution some time to collect, organize, package and ship the VST nozzle cores, VST will honor the \$105.00 enhanced core value (eligible VST cores) on shipments that are en route from VST Distribution **no later than February 28, 2011**.
 - VST recommends contacting your VST Distributor of choice so as to not miss their last \$105.00 nozzle core shipment back to VST.
 - For nozzle cores shipped after February 28, 2011, please contact your VST Distributor for the allowable core credit.

VST extends our thanks to everyone for your patience and understanding.
