UPDATE:
Enhanced Nozzle Core Value Extension

03.01.11

VST has extended our \$105.00 Enhanced Nozzle Core Value Program through April 29th, 2011 to support the positive response that we have seen with the introduction of our SRM-style nozzle.

Additionally, VST is continuing our development efforts with several new CARB approvals that will include additional systems to support the California EVR market. As part of these efforts that will be introduced shortly, we are evaluating our nozzle core program and working on a more comprehensive approach that will integrate these new systems.

Because the details of this evaluation will take a little more time than we anticipated, VST will extend the \$105.00 Enhanced Nozzle Core Value Program through April 29th, 2011. At that time we plan to introduce our ***NEW***, comprehensive nozzle core program.

Limited Time Extension:

1. In order to allow VST Distribution some time to collect, organize, package and ship the VST nozzle cores, VST will honor the \$105.00 enhanced core value (eligible VST cores) on shipments that are in route from VST Distribution **no later than April 29th, 2011.**
2. VST recommends contacting your VST Distributor of choice so as to not miss their last \$105.00 nozzle core shipment back to VST.
