## *New & Free to VST ASC's* **VST Insight™ Diagnostic Software**

---

VST announces the release of Insight™ diagnostic software designed to be used exclusively with our VST Total Balance EVR System.

Insight™ software is a free diagnostic program available only to *VST Authorized Service Contractors* and is downloadable from the VST website. Once you download this extremely user-friendly software to your laptop or PC, you are instantly able to interface with the Veeder-Root TLS and VST membrane processor to:

- Troubleshoot common ISD alarms:
  - Gross pressure
  - Degradation pressure
- Leak-check the hanging hardware to isolate leaks to a single dispenser, reducing the costly process of elimination
- Leak-check the complete vapor-recovery system without doing a costly **pressure** decay test
- Generate reports to prove that all alarms were correctly repaired before the tech leaves your site
- Prevent ISD alarms by economically and quickly catching small problems before they trigger an ISD alarm

Go to [www.vsthose.com](http://www.vsthose.com) and click on the Insight™ icon to download this invaluable diagnostic tool today!
