## UPDATE:

Executive Orders VR-203 and VR-204

Revision P

➤ G2 Next Generation Balance Nozzle

03.31.14

**VST introduces the ENVIRO-LOC™ G2 EVR Balance Fuel Nozzle with the release of Revision P for CARB Executive Orders VR-203 and VR-204.**

## **VST's Handshake with Your Customer.....Makes the BEST even Better!**

### Key Product Highlights for G2 EVR Balance Nozzles:

- ❖ Part Numbers VST-EVR-NBBK-2 (new) and VST-EVR-NBBKR-2 (rebuilt)
  - ✓ Packaging includes blue colored labels for easy recognition
  - ✓ Product nameplates are differentiated with blue text and a "G2" on the lever guard plate
- ❖ Demonstrates improved dripless/spitless and liquid retention performance for a cleaner forecourt
  - ✓ CARB testing demonstrated less than .003 lbs. of emissions per 1000 gallons dispensed
  - ✓ Newly patented interlock design reduces the probability of errant spills associated with damaged nozzles caused by customer abuse, drive-off events, or end of life
    - Damaged interlock mechanisms result in the nozzle having a dead lever and being inoperable
    - **ONLY EVR nozzle** with this patented safety feature
  - ✓ Offers a simpler, new front end kit design for easier replacement
  - ✓ May require dispenser cradle adjustments at the time of installation
  - ✓ Introduced as a rolling change to the marketplace
  - ✓ Remain competitively priced

Per CARB requirements with the release of Revision P, **all VST "Level A" ASC certified technicians must take the updated "Level A" ASC certification course**, which may be found on the VST website in the VST Education section. See link: <http://www.vsthose.com/education.aspx>. It is a FREE certification course.

### Current VST EVR nozzles with the secondary release mechanism (SRM):

- ❖ Part Numbers VST-EVR-NBBK-1 (new) and VST-EVR-NBBKR-1 (rebuilt)
  - ✓ Remain CARB EVR Certified and may continue to be used as long as they are functioning properly
  - ✓ Retain their exchange core value (undamaged cores) towards the purchase of G2 factory rebuilt nozzles

Remember, VST EVR balance hanging hardware is the most comprehensive option for more GDFs in the California EVR market than any other choice.<sup>1</sup>

<sup>1</sup> Not all EVR balance nozzles and safety breakaways are approved with all of the processor options. Carefully read Exhibit 1 in the Executive Orders.
