UPDATE:

CARB Testing Complete

On VST's Field-Reattachable

EVR Balance Safety Breakaway

VSTA-EVR-SBKA

04.23.13

VST has completed the California Air Resources Board (CARB) certification testing for our newest EVR product – **a Field-Reattachable EVR Balance Safety Breakaway**.

This latest VST EVR product is targeted for market availability with the release of Revision O for Executive Orders VR-203 and VR-204. We anticipate Revision O to be released in June 2013.

Key Highlights:

- **ONLY** EVR Balance Safety Breakaway that allows for in-line repair without removing from the dispenser or hoses.¹ Saves time and money.

- Completes the VST family of EVR Balance Breakaways:
 - ❖ VSTA-EVR-SBKA - Field-Reattachable
 - ❖ VSTA-EVR-SBK - Non-Reattachable (New)
 - ❖ VSTA-EVR-SBKR - Non-Reattachable (Factory Rebuilt)
- Provides GDF owners the opportunity to choose the VST breakaway that best fits their needs.
- **All VST EVR Balance Breakaways are eligible for “core” value** towards the purchase of any EVR Balance Breakaway in the VST family.
 - ❖ Contact your VST Distributor of choice for details and availability once Revision O of Executive Orders VR-203 and VR-204 are released.
- Competitively priced – same as the Non-Reattachable (New).
- Same high-quality product that you’ve learned to expect from VST.

¹ Read ALL CARB Executive Order Installation Instructions carefully, as other field-reattachable products require the breakaway halves to be removed from the hoses prior to repair.
