UPDATE:
New EVR Market
Nozzle Core Credit Programs

5.26.11

VST ANNOUNCES *NEW* CORE ALLOWANCE PROGRAMS (Includes EMCO and FFS Healy 900 nozzle cores)

Effective June 1, 2011

Now, not only can Gasoline Dispensing Facility (GDF) station owners recoup value for VST nozzle cores at the end of their useful life, but stations that are utilizing non-VST nozzles may upgrade to VST hanging hardware and recoup some trade-in value as well – where legally allowed.

VST is offering core values for EMCO and FFS (Healy 900) nozzles when a GDF converts to VST equipment.

Contact your VST EVR Distributor of choice for details.

VST is working hard to keep the California EVR market simple:

- Utilize Stage II Balance Systems
- Use VST hanging hardware

No other EVR hanging hardware is CARB EVR certified for more GDF sites than VST.

EXECUTIVE ORDERS

VR-203 (Non-ISD) – approved processors:

- > VST Membrane Processor
- > Veeder-Root Vapor Polisher
- > Franklin Fueling Systems Clean Air Separator
