UPDATE:

Executive Orders VR-203 and VR-204
Revision L

11.17.11

All you need is VST!!

VST EVR balance hanging hardware continues to be the most comprehensive option¹ for more Gasoline Dispensing Facilities (GDFs) in the California EVR market than any other choice.²

The release of Executive Order VR-204 – Revision L allows VST hanging hardware to now be used with the HIRT Thermal Oxidizer (HIRT VCS 100 Processor) and Veeder-Root ISD:

VR-203 (Non-ISD) – approved processors:

- ▶ VST Membrane Processor
- ▶ Veeder-Root Vapor Polisher
- ▶ Franklin Fueling Systems Clean Air Separator
- ▶ HIRT Thermal Oxidizer

VR-204 (ISD)³ – approved processors:

- ▶ VST Membrane Processor
- ▶ Veeder-Root Vapor Polisher
- ▶ Franklin Fueling Systems Clean Air Separator
- ▶ HIRT Thermal Oxidizer

Other key highlights included in the release of Executive Orders VR-203 and VR-204 Revision L:

- ▶ VR-203 and VR-204
 - ◆ Changing Daily hanging hardware inspections to Weekly inspections

- ▶ VR-204
 - ◆ CARB addressed an oversight in Revision K pertaining to the allowable options of Veeder-Root ISD software versions that can be used when converting a Franklin Fueling Clean Air Separator station from vacuum assist to VST EVR balance hanging hardware. See Exhibit 1: Veeder-Root ISD Software Compatibility Matrix

Always review the entire current Executive Orders for ALL updates relating to each Executive Order.

¹ VST is approved for all listed options in this Bulletin.

² VST has the only EVR balance nozzle and safety breakaway approved for all processor options. Carefully read Exhibit 1 in the Executive Orders when not using VST EVR hanging hardware.

³ Veeder-Root ISD only
