Letter from Glenn Walker

CARB has now approved the VST EVR hanging hardware components (hoses, breakaways, and nozzles) as compatible replacement parts for pre-EVR balance vapor recovery systems.

This means that a GDF operator may **immediately** begin installing VST EVR components as replacement parts for their pre-EVR vapor recovery systems.

The compatibility letter in its entirety may be found at:

1. The VST website at www.vsthose.com within the Executive Order VR-203A link.
2. The CARB website www.arb.ca.gov/vapor.vapor.htm

We are continually developing our website with updates, so we encourage you to keep checking the website for new information.

Sincerely,

Glenn K. Walker
