EMV Compliance Deadline For Fuel Dispensers

The VST Solution **TODAY** ...

to Protect Your Investment **TOMORROW**

Vapor Systems Technologies, Inc.

TODAY

Now is the time to decide...

- Upgrade or Replace Your Dispensers?
- Upgrade Your Vapor Recovery Technology?

Plan your Timing and Schedule!

- Equipment Deliveries are Extended
- Available Labor is Being Scheduled
- Allow for Permit Timing
- ALL OF THE ABOVE

It All Becomes
More Critical as

10.01.2020

Approaches

TOMORROW

...to protect your investment with
VST EVR Platinum Balance System

The Recommended Hanging Hardware of Choice in California

- Enhanced Protection during a Drive-Off Event
 - ✓ Anti-Stretch Safety Hose Cable
 - ✓ Patented Nozzle Safety Interlock Device
- Lower Total Cost of Ownership for GDF Owner
 - ✓ Reduced Equipment Damage
 - ✓ Fewer ISD Alarms
 - ✓ Higher Flow Rate
- Recognized VST Quality

TOMORROW

Convert An Expense Into An Investment!

Why Choose The New Platinum System?

Enhanced Safety Features...

Improve Your Forecourt Uptime!

Pays For Itself In Mere Months!

What Does a Drive-Off Really Cost You?

If you have ever witnessed the dramatic trauma of a drive-off event at a gasoline station, you know how violent it can be.

The Results Can Be Risky!

- Dispenser Damage – internally (meters) and externally
- Vehicle damage – dents or broken windows
- Customer protection – patrons struck by flying debris

The Results Can Be Costly!

- Dispenser down time
 - ✓ Loss of revenue
 - ✓ Component Replacement Expense
- In-Station Diagnostic alarms
 - ✓ Notice of violations (NOVs)
- Service Technician fees
 - ✓ Repair work

VST ENVIRO-LOC™ Platinum Hose Features:

- ✓ New Anti-Stretch safety cable that limits hose stretch
- ✓ Largest outer vapor hose in the industry for best results in reducing back pressure ISD alarms
- ✓ Variable Design Venturi (VDV) for industry's highest flow rates and best results in reducing flow collect ISD alarms

Compare Brand X in a drive-off situation...

To the new VST Platinum System...

With Platinum, the hose and couplings fall directly to the ground with little or no recoil in a drive-off.

Go to <http://www.vsthose.com/education.aspx> and watch the EVR Platinum Balance Hose Simulated Drive-Off video.

Outer Hose: Platinum's larger vapor path reduces back pressure and alarms:

Brand X hose liquid pickups move out of the CARB 3" tolerance range in drive-off situations

Platinum's new anti-stretch safety cable

Platinum's exclusive Variable Venturi Design allows the industry's highest flow rates

The VST Platinum liquid pickups show zero displacement after multiple simulated drive-off tests

EVR ENVIRO-LOC™ G2 Balance Nozzle Features:

- ONLY patented safety interlock design
- Designed to be inoperable when the safety interlock becomes damaged
- Dripless/Spitless technology for fewer spills and cleaner forecourt
- Light weight with proven performance

Safety Interlock Design

Articulating face seal maintains a tight seal on vehicle filler necks for efficient vapor collection

ENVIRO-LOC™ Reattachable Balance Safety Breakaway Features:

- Field reattachable
- Simple repair kit
- In-line repair capability with VST repair tool
- Protective Scuff Guards (Optional)

Mixing and Matching Hanging Hardware Components Produces Costly ISD Alarms...

So Choose Wisely and Reduce Your Total Cost of Ownership!

The VST Platinum System Components Are Engineered To Work Together To Reduce Risk and Cost
