

The ! Voice

VST Mission

To design and manufacture innovative products for retail refueling systems that are specifically engineered to protect the environment and consumers with safety and reliability.

VST Green Initiative: Carbon Neutral

Gonzalo Perez, Application Engineer { perez@vsthose.com }

Sustainability

Since inception in 1990, VST has been setting industry standards on sustainability. This year, we set company goals to further improve our environmental footprint. Our primary goal is to become a Carbon Neutral company. VST products already reduce harmful Volatile Organic Compounds (VOC's) in a gasoline dispensing facility (GDF) by over 98%. Now, we also want to also make our manufacturing sustainable. Starting his year, we will work with Carbon Neutral to begin the Carbon Neutral Certification process.

Benefits of the VST Carbon Neutral Certification

The Carbon Neutral Certification process will allow VST to quantify our carbon footprint. This carbon quantification will be used:

First, it will allow VST to find areas for improvement, which will guide us in implementing a Carbon Neutralization plan.

Second, it will allow us to share our carbon footprint and yearly sustainability reports with others via The VST Voice and our website.

Once our Carbon Neutralization plan is implemented, we will offset any remaining carbon. This carbon offset process will be assisted by Carbon Neutral with environmental projects. Some of the projects include: Amazon reforestation; wind energy implementation in India; solar cookers for rural China; solar energy implementation in East Africa; water filtration in Guatemala; and North American grasslands conservation.

VST is excited to continue this new journey to sustainability. We are proud to reduce carbon emissions in both customers' gasoline dispensing facilities and at our own facility. We will share our journey as we progress through the Carbon Neutral Certification process, hopefully giving ideas to others about reducing carbon footprints.

You can learn more about our journey by following us on LinkedIn.

VST Values

R: Respect
Employees,
Customers, Vendors,
and Environment

O: Operational
Excellence, Quality,
Delivery, Safety &
Cost

I: Innovative Passion,
Unique, Industry
Leader, and
Committed to
Excellence

VST Vision

VST strives to become the most trusted company in the global gasoline dispensing industry by manufacturing environmentally sustainable products and solutions that reduce harmful vapor emissions to create a future that protects the communities in which people live and work every day.
