**FOR IMMEDIATE RELEASE**

**VST EXPANDS PRODUCT OFFERING  
 WITH UL LISTED 2583 PRESSURE VENT VALVES**

**Springboro, Ohio – USA – October 17, 2022 –** VST introduces our newest innovative product targeted at reducing fugitive emissions at gasoline dispensing facilities – UL Listed 2583 Pressure Vent (P/V) Valves. The **VST SENTRY™ P/V Valves** are highly engineered products designed to protect the structural integrity of the Underground Storage Tank (UST) from extreme positive and negative pressure conditions caused by fuel drops and vehicle refueling events. These robustly, unique P/V valves are the latest addition to our product offering aimed at preventing unwanted vapor emissions from escaping into the environment.

VST offers two styles of the SENTRY™ P/V valve.

1. **VST-PV-100** is a top-mount model that can be installed near the top of the vent pipe. It can be used as a quick and easy replacement for any traditionally installed P/V Valve.

Every SENTRY™ P/V valve is shipped with a **VST-RC-200** specific style protective rain cap to keep out water and foreign debris.

2. **VST-PV-200** is an industry innovation that can be installed and tested at an easily accessible mid-mount vent pipe location. This model allows a tester the opportunity to test-in-place at ground level. No need for a ladder or lift.

Test-In-Place Kit for VST-PV-200

- **VST-TIP-200** kit includes:
  - ✓ Stainless steel TIP stinger
  - ✓ Testing hose
  - ✓ Bell adapter for connection to P/V test unit  
(P/V test unit not included)

**About VST**

VST specializes in the development, engineering, manufacturing, and sale of innovative solutions for the retail fuel dispensing industry. Products include hoses, safety breakaways, nozzles, storage tank pressure management processors, and P/V Valves. For more information about VST, go to [www.vsthose.com](http://www.vsthose.com).
