ENVIRO-LOC™ Platinum Phase II Balance Enhanced Vapor Recovery (EVR) hoses

VST has consolidated our ENVIRO-LOC™ Phase II Balance hose offering to **The Ultimate Risk Management tool** – our premium ENVIRO-LOC™ **Platinum** Phase II Balance Enhanced Vapor Recovery (EVR) hoses.

These uniquely designed hoses with an anti-stretch cable were introduced in 2016 and aimed at:

- ✓ Protecting customers standing on the forecourt during a drive-off event
- ✓ Protecting station owners' equipment during a drive-off event
- ✓ Improving the life of the hose that has been involved in a drive-off event
- ✓ Reducing In-Station Diagnostic (ISD) alarms
- ✓ Reducing maintenance expenses

Over the years, VST and the marketplace agree that these premium hoses are the best choice.
