**FOR IMMEDIATE RELEASE**

**VST earns California Air Resources Board (CARB) certification  
on new product – EVR P/V Valves**

**Springboro, Ohio – USA** – September 20, 2024 – VST has earned our latest California Air Resources Board (CARB) Enhanced Vapor Recovery (EVR) Certified product. The SENTRY™ VST-EVRPV series of Pressure/Vacuum valves is VST’s first EVR Phase I approved product. These patented, innovative P/V valves offer the marketplace a unique mechanical design without springs or diaphragms. A simple approach for longer life. Compatible with E0 to E85 fuel blends.

There are two styles of SENTRY™ VST-EVRPV series:

1. **VST-EVRPV-100** is a top-mount model that can be installed near the top of the vent pipe. It can be used as a quick and easy replacement for any traditionally installed P/V Valve
2. **VST-EVRPV-200** is an industry innovation that can be installed and tested at an easily accessible mid-mount vent pipe location. No need for a ladder or lift.

Every SENTRY™ EVRPV valve is shipped with a **VST-RC-200** specific style protective rain cap to keep out water and foreign debris.

Test-In-Place Kit for VST-PV-200

- **VST-TIP-200** kit includes:
  - ✓ Stainless steel TIP stinger
  - ✓ Testing hose
  - ✓ Bell adapter for connection to P/V test unit  
(P/V test unit not included)

**About VST**

VST specializes in the development, engineering, manufacturing, and sale of innovative solutions for the retail fuel dispensing industry. Products include hoses, safety breakaways, nozzles, underground storage tank pressure management processors, and P/V Valves.
