VST-EVRPV Valves Approved on All CARB EVR UST Executive Orders

VST's latest product introduction, VST-EVRPV valves are approved on all four (4) active CARB EVR Phase I Executive Orders for Underground Storage Tanks (USTs). [Executive Orders: VR-101, VR-102, VR-104, and VR-105](#)

These patented, innovative P/V valves offer the marketplace a unique mechanical design without springs or diaphragms. A simple approach for longer life. Compatible with E0 to E85 fuel blends. There are two styles of SENTRY™ VST-EVRPV series:

VST-EVRPV-100 is a top-mount model that can be installed near the top of the vent pipe. It can be used as a quick and easy replacement for any traditionally installed P/V valve.

VST-EVRPV-200 is an industry innovation that can be installed and tested at an easily accessible mid-mount vent pipe location. No need for a ladder or lift.

Every SENTRY™ EVRPV valve is shipped with a **VST-RC-200** specific style protective rain cap to keep out water and foreign debris.

Test-In-Place Kit for VST-EVRPV-200

- **VST-TIP-200** kit includes:
 - Stainless steel TIP stinger
 - Testing hose
 - Bell adapter for connection to P/V test unit (P/V test unit not included)

VST Mission

To design and manufacture innovative products for retail refueling systems that are specifically engineered to protect the environment and consumers with safety and reliability.

VST Values

- R:** Respect Employees, Customers, Vendors, and Environment
- O:** Operational Excellence, Quality, Delivery, Safety & Cost
- I:** Innovative Passion, Unique, Industry Leader, and Committed to Excellence

VST Vision

VST strives to become the most trusted company in the global gasoline dispensing industry by manufacturing environmentally sustainable products and solutions that reduce harmful vapor emissions to create a future that protects the communities in which people live and work every day.
