ENVIRO-LOC™ ECO Interlock Conventional Rebuilt Nozzles

VST has been successfully marketing the ENVIRO-LOC™ Interlock Dripless/Spitless Conventional Nozzles for several years across multiple states with many more states currently looking to add this unique technology to their regulatory requirements. Improving the forecourt cleanliness with less spillage and reducing hazardous fugitive emissions for better air quality continues to grow in popularity for everyone's benefit.

We have now launched our **REBUILT** version to the marketplace.

Rebuilt Nozzle Part Numbers

- VST-NV-ND(cc)R – for gasoline
- VST-DS-ND(cc)R – for diesel

** (cc) designates color code of the nozzle scuff

Our sustainability efforts are strong and continue to get stronger. VST is the **ONLY** manufacturer that offers a **CORE** value for both the new and rebuilt models of these nozzles. So, when these nozzles reach end-of-life, be sure to collect them rather than putting them in a landfill. They have **VALUE!**

VST works with our distribution partners so we can continue our efforts in offering a rebuilt nozzle.

Black = BK

VST-NV-NDBKR
