

VST: New President & CEO

Scott Brown, VP Sales & Marketing brown@vsthose.com

VST Announces Alan Betts as President and Chief Executive Officer

Vapor Systems Technologies (VST), a leading provider of emission control and petroleum dispensing solutions, is pleased to announce the appointment of **Alan Betts as President and Chief Executive Officer**.

Mr. Betts brings 30+ years of experience in the petroleum equipment industry, including key roles of sales leadership, commercial strategy, business development, operations, and customer relationships. Throughout his career, he has worked closely with petroleum marketers, distributors, equipment manufacturers, and other industry stakeholders across North America.

He succeeds longtime VST President and CEO **Glenn Walker**, who is retiring after founding the company in 1990 and helping establish VST as a recognized leader in the retail petroleum equipment industry. Mr. Walker will remain involved and continue supporting VST as the Chairman of the Board.

"Alan understands our industry, our customers, and the markets we serve," said Walker. "I'm confident VST will be in good hands under his leadership, and I look forward to watching the team continue to succeed."

"VST has earned an outstanding reputation for its products, technical expertise, and commitment to its customers," said Betts. "I have known and respected the company for many years, and I'm honored to have the opportunity to lead VST into its next chapter."

As President and CEO, Betts will lead VST's strategy and operations with a focus on serving customers and distribution partners, advancing product innovation, strengthening operational performance, and pursuing opportunities for continued growth.

"My first priority is to listen and learn – from our employees, distributors, marketers, and industry partners," Betts added. "VST has a talented team and a strong position in the market. I'm excited to build on what Glenn and the organization have accomplished while preparing the company for the opportunities ahead."

About VST:

VST specializes in the development, engineering, manufacturing, and sale of innovative solutions for the retail fuel dispensing industry. Their product lineup includes hoses, safety breakaways, nozzles, underground storage tank pressure management processors, and P/V Valves. For more information, visit www.vsthose.com.

VST Mission

To design and manufacture innovative products for retail refueling systems that are specifically engineered to protect the environment and consumers with safety and reliability.
